About Me

Senior software engineer with **5**+ years building high-throughput payment and marketplace systems in **Java**, **Spring Boot**, **Kafka** and **Kubernetes**. Scaled payments to 12,000+ TPS at sub-80ms latency and enabled $20M+ in cross-border.

Professional Experience

Senior Software Engineer, *Walmart Global Tech* 04/2023 – Present

Project 1: **Cross-Border Trade (CBT) & Remote Fulfillment Platform** | **Team of 6 engineers**

- Built the seller onboarding sellers platform that expanded Walmart's marketplace into Canada and Mexico; fulfillment services showcased at the 2025 and 2026 Seller Summits.
- Owned end-to-end **Apache Spark pipelines** and **onboarding APIs**; built rule checks (cancel rate, on-time delivery, compliance) served via **GraphQL**/**Spring Boot** over **Kafka**.
- **Impact:** automated qualification of **15,000+** merchants, **68% faster onboarding**, **$20M+** GMV (FY25–FY26).

Project 2: **Enterprise Payments & Transaction Settlement** Platform | **Team of 7 engineers** Apr 2023 – Apr 2024

- **Architected high-availability payment gateway services**, idempotent settlement layers and multi-currency verification; spearheaded **API security** and reconciliation.
- Eliminated double settlements with distributed locking and tokenized validation (Kafka to PostgreSQL/Cosmos DB, on Kubernetes).
- Impact: **12,000+ TPS at sub-80ms latency**, **24%** fewer payment failures, an estimated ~$8.5M in annual checkout value.

Software Engineer, *L&T Infotech (LTI)* 01/2020 – 01/2022

Project: **Enterprise Banking Transaction Engine & Data Modernization** | **Team of 8 engineers** India

- Modernized legacy banking pipelines into event-driven **Java/Spring Boot microservices** for account validation and ledger reconciliation.
- Built **REST APIs,** asynchronous batch jobs and automated database migrations; reached **88% test coverage**.
- Impact: reconciliation cut from 4.5 to 2.5 hours (44%) with 99.98% pipeline uptime.

Education

Master's in Computer Science, *Wichita State University* 01/2022 – 08/2023

Bachelor's in Electronics and Communication Engineering, 2016 – 2020

Sree Venkateswara College of Engineering

Technical Skills

Languages — Java, Python, SQL (PostgreSQL, Oracle, Azure), JavaScript
Distributed systems — Apache Kafka, Apache Spark, microservices, idempotency, distributed locking, REST APIs
Cloud and infrastructure — Azure, Kubernetes, Docker, Jenkins CI/CD, Git, Maven
Data and storage — PostgreSQL, Cosmos DB, Redis, Oracle SQL, AzureSQL
Frameworks and testing — Spring Boot, React, Angular
